

[illegible]

A 3D architectural rendering of a school campus layout. The main building is a large, multi-story structure with a complex roofline, including a central gabled section and several smaller wings. It features numerous windows and a prominent entrance. To the left of the main building is a large, rectangular green field, possibly a sports field or lawn. Adjacent to the field is a long, low white structure, likely a gymnasium or indoor sports facility. The entire campus is enclosed by a dark grey wall, with a gate visible on the left side. Several trees are planted around the perimeter and near the buildings. The rendering is shown from an elevated perspective, highlighting the overall design and spatial organization of the school grounds.

The illustration below shows the new location for the Marquee at the back of the building away from Aigburth Vale/Sefton Park Court residents. We have had the Marquee here for 5 years before we moved it in April 2014. It was here for 5 years without any complaint. There configuration is smaller here too with the Marquee size being only 12mx21m

The illustration below indicates the approximate view as seen from Sefton Park Court Flats with the Marquee located at the back of the building in the proposed location. The Marquee is completely masked by Aigburth Peoples Hall and is away from residential flats – instead is closer to Sefton Park
