Hi Gregor

The jobs were issued to our Radio Works Control on 25/07/15 and will be completed in the next couple of weeks by their field teams. The planning condition can safely be discharged.

Thanks

Regards

Hi Dale,

Hope you're well. Could you confirm whether the works relating to the wind turbine at Fazakerley have been carried out or if they are scheduled please? We have received acknowledgment of payment ok, but we need to discharge the planning condition.

Many thanks

Best Regards

Gregor Hogarth

Hi Gregor

The planning of this work and the execution will be carried out by our Radio Planners and Rigging teams. As far as I'm aware the diversion/re-routing of our radio link will be done without the need to access your site.

Thanks

Afternoon Gregor

Please find attached quotation for diversion works at Fazakerly Wind Farm development. Please quote your reference CNS203212 on all correspondence. The CNS Quotation acceptance doc must be completed and returned as it is giving your permission for Openreach or one of its approved contractors to carry out the works you have requested. Payment in advance is required and methods of payment are detailed in the CNS PDF form. Until payment is received no further work can take place with regards to this order. However please also inform me by way of email of your acceptance so I can plan resource for the work required as far in advance as possible.

Thanks

If you require any further information please don't hesitate to contact me.

Kind Regards
