LFC Stadium Expansion

TOWNSCAPE VISUAL IMPACT ASSESSMENT: VISUALISATIONS

APRIL 2014

Aerial photograph of the existing stadium

INTRODUCTION

This document has been collated to outline a series of viewpoints around the LFC Stadium to assess the visual impact of the proposed stadium expansion.

The proposed viewpoints have been selected from nearby locations and cover typical views from, adjacent residential areas, key public spaces and listed structures or monuments.

Whilst these are not prescriptive we believe the views proposed offer a good base from which to assess any visual impact, with particular consideration made to more prominent views and those that may be deemed as highly sensitive receptors.

As part of the assessment it is proposed that the visual impact will be considered for both expansion phases; the Phase 1 expansion to the main stand, and Phase 2 to the Anfield Road stand.
