Subject: RE: Consultation on Wind Turbine Aviation Warning Lighting - Fazakerley Waste Water Treatment Works

Hi Janine

I have received some feedback from our aircraft partners who are happy that the wind turbine is far enough away from the landing site at Aintree not to represent a significant hazard but it will sit on the ENE approach. In respect of this they have requested that the turbine be equipped with low intensity steady (generically 32 candela) obstruction beacon, as near to the top as possible, seen from all directions.

Hope this information is suitable. We do work with a company who provides us with obstruction lights for our projects who we recommend so if you would like their contact details please do not hesitate to contact me.

Kind regards

Ian Lockhart

Good Afternoon Janine

Thanks for your email. I have forwarded your correspondence to the head of flight ops at our aircraft provider and also consulted the estates department at Aintree University Hospital as this will obviously affect any proposed developments they have for a primary landing site.

Will come back to you as soon as I have feedback from both these parties.

Kind regards

Ian Lockhart

Dear Mr Lockhart

I contacted you last week regarding an approved wind turbine development in Fazakerley. As per the email below, we would like to consult the Air Ambulance over any turbine warning lighting requirements that it may have before the turbine is erected. We are currently in the process of discharging planning conditions with a view to commencing construction later in the year. Your input at this stage is therefore sought so that the developer can give regard to AA requirements at pre-construction stage.

I look forward to hearing from you.

Kind regards
Janine

Subject: Consultation on Wind Turbine Aviation Warning Lighting - Fazakerley Waste Water Treatment Works

Dear Mr Lockhart

RE: Approved 78 m high Wind Turbine: Fazakerley Waste Water Treatment Works, Stonebridge Lane, Liverpool, L10 5HA

I work for Arcus Consulting and are assisting United Utilities to meet the conditions of the planning permission that was issued by Liverpool City Council in December 2014 for a 78 m high turbine in Fazakerley (Planning Permission No. 14F/1296). Condition 19 of the planning permission states:

The wind turbine shall not be illuminated by lighting other than service lighting required under safety requirements for tall structures and any air safety lighting required by other authorities or bodies, without prior written approval of the Local Planning Authority.

We therefore want to understand if the North West Air Ambulance Service has a requirement for aviation warning lighting on the turbine and if so the type of lighting that is recommended. Full details of the approved application can be found on the Council's website at the following weblink:

http://northgate.liverpool.gov.uk/PlanningExplorer17/Generic/StdDetails.aspx?PT=Planning%20Applications%20Online&TYPE=PL/PlanningPK.xml&PARAM0=899253&XSLT=/PlanningExplorer17/SiteFiles/Skins/Liverpool_WIP/xslt/PL/PLDetails.xslt&FT=Planning%20Application%20Details&PUBLIC=Y&XMLSIDE=/PlanningExplorer17/SiteFiles/Skins/Liverpool_WIP/Menus/PL.xml&DAURI=PLANNING

I look forward to hearing from you in due course.

Kind regards

Janine
