BM

Richard

Pease find attached confirmation that resolves planning condition 8, water network behaviour/demand modelling exercise. I have also attached the current demolition RAMS for inclusion in condition 3.

Kind Regards,

Billy McNicholas

Billy

Further to our recent discussions regarding the clean water provision for your Pall Mall development, I am pleased to inform you that United Utilities has confirmed that this development can be supplied from their existing 12 inch water main located on Pall Mall. The attached correspondence and supporting plan from United Utilities confirms this availability without the need for any network reinforcement's.

I believe the attached information will now allow you to discharge Planning Condition 8.

If you need any further information please do not hesitate to contact me.

Kind regards

Nigel Appleton
