## Site Plan

The site contains 4 no. trees of varying age and condition, all of which sit along the principle elevation of Lingmell road. The following report details each tree, it's type, condition, and recommended works.

Tree no. 1

Species: **Fraxinus Excelsior**

Age of tree: **Semi Mature**

Height: **Approximately 9 metres**

Condition: **Poor, showing signs of disease**

Recommended work: **Fell to ground level**

Tree no. 2

Species: **Fraxinus Excelsior**

Age of tree: **Semi Mature**

Height: **Approximately 8 metres**

Condition: **Poor, showing signs of disease**

Recommended work: **Fell to ground level**

Tree no. 3

Species: **Fagus Sylvatica**

Age of tree: **Semi Mature**

Height: **Approximately 9 metres**

Condition: **Poor, previously**

Recommended work: **Fell to ground level**

Tree no. 4

Species: **Acer Campestre**

Age of tree: **Semi Mature**

Height: **Approximately 8 metres**

Condition: **Fair**

Recommended work: **Fell to ground level / 30% crown prune**

## **Conclusion & Recommendations**

The site has 4 semi mature trees, three of which show signs of disease and are moderately decayed. Our recommendation is to fell all 4 trees, and to replant new trees on the site. Our proposal is to re-plant 2 new trees for every 1 mature tree that is to be felled.
