

Site 22, Paradise Street Development Area

Application Approval 14F/2219

Planning Condition 10(iii) External Lighting.

The information submitted for this condition has been provided by the M&E contractor HE Simms.

The latest planning approval introduced roof terraces to all three blocks. The will generate some animation to the top roofs and it is critical that suitable lighting levels cover the roof terrace area. These will be introduced to the cladding side elevation. This will not cause any lighting signing into the studios as they are all located on the opposite side of the building to the terrace.
