

This request is to remove two laylandii from our property. It is unknown if the laylandii is the subject of a Tree Preservation or a conservation order. By virtue that the trees existed when we purchased our property we are merely making this application to ensure that there are no orders in place before removing the laylandii.

The two laylandii were planted by the previous owner and have grown approximately 60 feet in height reducing natural daylight coming into our property & unfortunately have caused damage to our neighbours driveway.

The laylandii are dangerously high.

It is our intention, once the ground which is very dry, to remove before planting a privet hedge & low level bushes. Please see attached sketch & the two laylandii subject of this application is marked out.
