Reviews

Driveway Duty, Slim Steel Paving Cover & Plastic Frame with integrated heavy duty keys.
Manufactured to F.A.C.T.A. Load Class AAA (10 tonnes gross laden vehicle weight)

Designed to suit a 600x450mm Manhole Opening for paving slab situations

600x450mm clear opening
80mm deep frame - lid accepts up to 50mm deep paving slabs
690x540mm overall frame

To open, simply remove the plastic caps, raise the integrated lifting key and lift the lid to clear the opening!

The design of the heavy duty integrated keys allow the user to use a bar on the lifting handle to help lever the lid free, additionally the plastic frame helps reduce bonding between the lid and frame making for an easier initial lift.
